DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/671,918.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Norton ('795)

Norton discloses a ratchet device comprising a control body (15), two sets of symmetrical arresting members or pawls (26-29), a ratchet body (16), a toothed portion (32), a shifter (45), for actuation elements (37), a spring (33), an actuation projection (38), a tongue (30, 31), a tip (13), a slot (46), and a locking ring (Fig. 3).

Allowable Subject Matter

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Norton ('060), Grimsley ('635), Romanauskas ('293), Norville

('773), and Huang ('147) disclose other ratchet devices having symmetrical arresting members.
